## RESCOM: Scientific Events Call 2023 Evaluation Results

Reference: 17937294  
Project title: Human-in-the-loop Applied Machine Learning (Hitlaml)

Dear Dr Yilma,

The National Research Fund Luxembourg (FNR) would like to thank you for having submitted a project proposal under the RESCOM Scientific Events Call 2023.

The selection process consisted of a remote evaluation of each eligible project by members of the standing committee and a subsequent discussion based on these reviews. All standing committee members unanimously supported the funding recommendation. The recommendation by the standing committee forms the basis for the funding decision by the FNR.

The FNR has the pleasure to inform you that your above mentioned RESCOM Scientific Event project proposal is retained for funding. Please find included in annex the panel conclusion of the panel's appreciation of your proposal.

For this project the funding will be attributed for a maximum amount of **36.900 EUR** (included 10% gender balance and additional budget).

Be aware that the FNR contract should be signed by all contracting parties at project start or at the latest up to 12 months after this funding letter otherwise the funding may be cancelled by the FNR.

Finally, we would like to thank you very much again for your participation in the RESCOM Scientific Event programme and we wish you all the best for your event and your group's future efforts!

We look forward to hearing from you.

Yours sincerely,

Dr Marc Schiltz  
Secretary General

Ms. Susanne Rick  
Programme Manager
